

Vinyl Adhesives

For PVC Fencing, Decks, Windows, Sidings and Railings

Christy's™

CHRISTY'S KNOWS SOLVENTS !

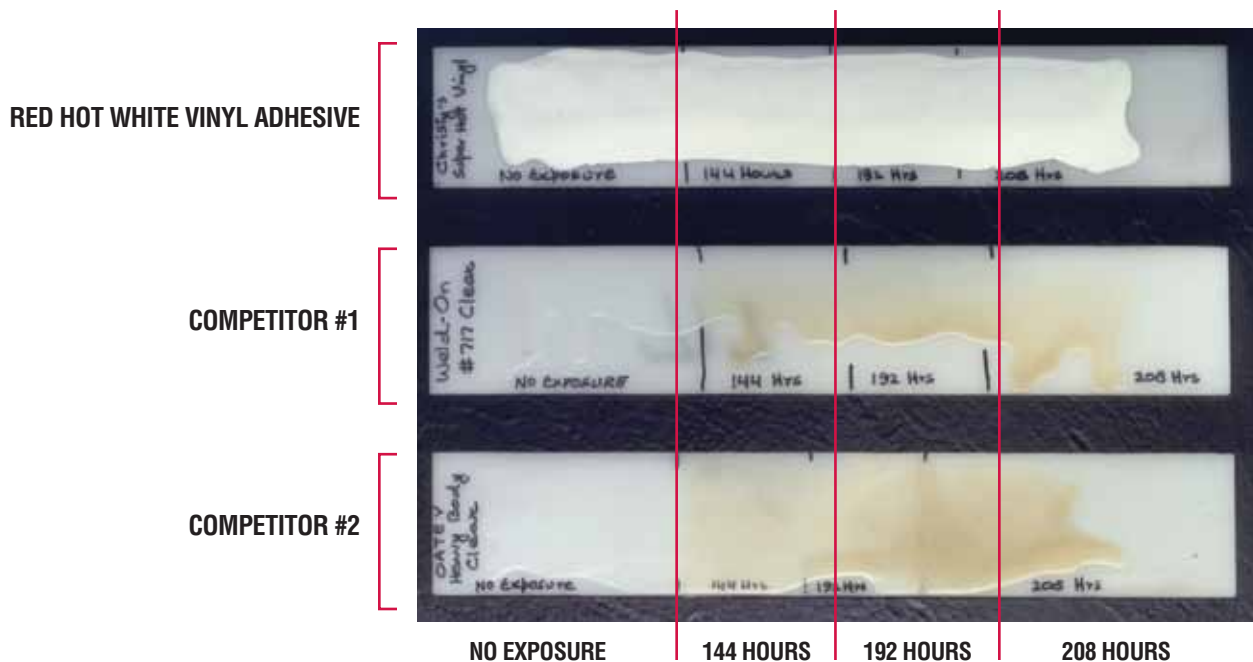

Over three decades ago, T. Christy Enterprises, Inc. introduced Red Hot Blue Glue® to the solvent cement industry. Christy's™ Red Hot Blue Glue® was formulated to be the finest PVC solvent cement available. Today, Red Hot Blue Glue® continues to be the best all-weather, rain-or-shine, wet-or-dry, hot-or-cold PVC solvent cement formulation available. Over the years, we have expanded our offering to include solvent products for many applications, including PVC fence, deck, siding and window installations. Christy's Red Hot Vinyl™ Adhesive offers superior adhesion and weathering capabilities.

WHY RED HOT VINYL ADHESIVE ?

BENEFIT FROM RED HOT VINYL! Our adhesives provide superior adhesion and long-term UV stabilization. The sun's natural ultraviolet (UV) rays will destroy and discolor PVC and many of its additives unless specifically formulated to guard against degradation. Our Red Hot Vinyl™ adhesives are formulated to protect against this.

THE TEST To prove the point, Christy's compared its Red Hot White Vinyl™ adhesive against other clear solvent cements widely used throughout the industry and subjected them to UV testing. Product was troweled and feathered on opaque white acrylic plates. At 144 hours under the UV lamp, discoloration was evident with competitor #1 and #2. At 192 hours, the discoloration was more intense, and at 208 hours the test was terminated due to obvious discoloration.

CHRISTY'S RED HOT VINYL ADHESIVES

WHITE (WARM WHITE)

CHRISTY'S RED HOT VINYL—WHITE

Description	Part No.	Size	Case Qty.
