JET SWET™ WATERLINE REPAIR

DESCRIPTION

- The original tool for soldering with water in the line
- Professionals Choice for over 20 years
- Insert into any water line system and immediately plug off the water - Do the repair (including soldering) over the Jet Swet™ and remove it through the newly repaired fitting.
- Ideal for pipe repairs with Schedule 40 PVC, Schedule 80 PVC, Steel Pipe: Galvanized or Black and Copper Pipe type L or M, Valve repairs, replacing 90° elbows and repairing pinhole and mid-pipe leaks.
- Flo-Thru™ Jet Swets™ have a 1/2" or 3/4" cavity down the center of the tool allowing for the addition or drainage of water pressure while working.
