Christy's Introduces Clear Adhesive for PVC Fencing

(Anaheim, California) T. Christy Enterprises introduces Red Hot Clear Vinyl Adhesive, a high-performance clear adhesive that has been specifically engineered for use in assembly of PVC fencing.

Red Hot Clear Vinyl applies clear and dries to a transparent and waterproof bond. It has been formulated with special ingredients to resist UV-degradation, yellowing and cracking for a clean, clear appearance year-after-year. It is not affected by weather or temperature extremes and is resistant to outdoor and landscape chemicals.

Because of its clear color, Red Hot Clear Vinyl can be used on all types and colors of PVC fence, railing, deck, siding and windows for both installation and repairs.

About T. Christy Enterprises

T. Christy Enterprises is one of North America's largest manufacturers of adhesives and solvents used in the drainage, waterworks, plumbing, pool and spa, irrigation and fencing industries. The company specializes in creating adhesives and solvents for wet and muddy conditions, cool and wet climates and high productivity environments where fast set/fast cure is critical. The 40-year old company's Red Hot Blue Glue is the top-rated adhesive for PVC pipe and fittings.
