Christy's Introduces Ultra Seal T-10,000 Thread Sealant

(Anaheim, California) T. Christy Enterprises introduces Ultra Seal T-10,000, a sealant for threaded pipe connections rated leak-free to pressures as high as 10,000 PSI.

Ultra Seal T-10,000 works with both plastic and metal piping systems, allowing professional contractors to carry one versatile product for all standard applications. It is compatible with copper, galvanized, iron, PVC, nylon and polyethylene fittings as well as many other types of threaded connections.

It contains virgin PTFE for easier assembly of connections. It also contains an anti-galling compound that prevents thread seizing, allowing for easy disassembly of connections even after years of service. Ultra Seal T-10,000 applies easily as brushable grit-free paste that is white in color.

About T. Christy Enterprises

T. Christy Enterprises is one of North America's largest manufacturers of adhesives, solvents and sealants used in the plumbing, pool and spa, irrigation and waterworks industries. The company specializes in creating products that meet the needs of professional contractors with easy use, compatibility with adverse conditions and proven reliability. The 40-year old company's Red Hot Blue Glue is the top-rated solvent cement in the irrigation industry.
