

## **BFSC Backflow Security Covers**

## **PRODUCT SPECIFICATIONS**

**PRODUCT TYPE:** Back Flow Security Covers

**DESCRIPTION:** These security covers are custom designed for insulated backflow prevention devices. The R-19 insulation helps protect the backflow prevention device from vandalism and freeze. The security cover also helps to conceal unsightly devices from the public eye.

**APPLICATIONS:** Each application is different and so each security cover must be properly sized and fitted to each device. (Reference chart below)

<b><u>Device Size</u></b>	<b><u>Security Cover Size</u></b>
3/4" Device	20" x 18"
1" thru 1-1/4" Device	24" x 24"
1-1/2" thru 2" Device	36" x 24"

(The above should fit under nominal installations)

**SPECIFICATIONS & INDUSTRY LISTINGS:** Each one of our bags is made from high grade material with R-19 insulation.

**PACKAGING & HANDLING:** Each one of our Backflow Security Covers is individually packaged. There are no special considerations needed when handling this material.
