GEOTEXTILES

No matter the landscape project, Christy's offers a comprehensive range of durable solutions for weed control, drainage, filtration, soil stabilization and erosion control.

- 57 LANDSCAPE FABRIC
- 58 DRAIN FILTER FABRIC
- 59 DRAIN EEZ DRAIN SOCK
- 60 ACCESSORIES

LANDSCAPE FABRIC

A barrier that blocks the majority of weed growth and slows evaporation. Ensures plant health by allowing water, fertilizer and air to permeate roots. It conserves soil moisture while promoting plant growth. Ideal for soil separation and is permanent if covered from UV rays. Use in flower beds, around or behind retaining walls, under wood decks, and under decorative stone or bark. Heavier weight fabrics produce better results.

DRAIN FILTER FABRIC

Professional grade fabric for dewatering and runoff protection. Use around perforated pipe to keep out debris and maintain water flow. Protect septic drainage systems from silt and native backfill. Creates stable subsoil with less ground movement. Can be used behind retaining walls and under mortar, pavers, crushed rock or mulch paths to increase longevity. Prevents the mixing of soil with aggregate or sand base. Minimizes the effects of rutting, low spots and ground heave on patios and driveways. Ideal on landscaped slopes to reduce runoff and keep decorative material in place. Inert to common soil chemicals. Won't fray or unravel and is easy to install with Christy's staples to secure fabric.
